- The Solution
Our Mission

Consistent risk-based approach to community risk management planning

A national definition of risk

Enable UK FRSs to focus resources on activities where they will have the greatest impact on reducing risk and vulnerability

Standardisation of guidance

Our Mission

The Challenge

Evidence Building

Vision

The Solution

Seven Projects

Key Benefits

Implementation
There is no single UK-wide methodology or guidance to assess FRS related risk and reduce harm in communities.
CRP Board commissioned an independent review by Nottingham Trent University.

43 UK FRSs took part.

The report identified gaps and good practice and made recommendations on areas for improvement.
To be the evidence-based digital toolkit for assessing UK FRS related risk and vulnerability to improve the safety, health, well-being and economic prosperity of communities.
A digital toolkit that is accessible and flexible for all UK FRSs to use. This is being developed with:

- **TWG**
  Technical Working Group - UK FRS risk management practitioners

- **Key sector stakeholders**

- **NFCC Committees and Programmes**

- **UK FRS**
  Community risk experts from all FRSs

- **SME**
  Subject matter experts external to the FRS e.g. academics
Seven Projects

The digital toolkit will be comprised of the products of each project.

- Definition of risk
- Economic and social value of the UK FRS
- CRMP guidance
- Data
- Evaluation: fire interventions
- Evaluation: methodologies
- Competencies

Our Mission → The Challenge → Evidence Building → Vision → The Solution → Seven Projects → Implementation → Key Benefits
Key Benefits

Enhanced collaborative opportunities e.g. promotes shared learning and skills, improves effectiveness of services.

Better informed, transparent and justifiable decision-making.
A phased approach to commencing projects

Products will be available as and when completed

Implementation Team to support UK FRSs
